# About Us

Sustainedge stands at the forefront of **Sustainable Urban Solutions, Technologies Advancing Innovation and Networking**. Our focus lies in the realms of urban development, sustainability and environmental considerations. We take pride in offering cutting-edge solutions that not only empower our clients with a competitive advantage but also contribute to a more sustainable and resilient future.

Distinguished by our commitment to continuous improvement, we actively stay up-to-date of the latest sustainability practices. Sustainedge thrives on collaboration, uniting diverse stakeholders to work collectively toward common goals. Our vision is rooted in the belief that through collaborative efforts, we can create a future that is not only sustainable but also inclusive. Environmental and Sustainability Actions form a core aspect of our work, integrating environmental concerns into actionable programs for climate resilience and effective planning.

Our commitment to capacity development involves supporting individuals and organizations in enhancing their skills and ensuring that sustainability initiatives are successful in the long term.

In essence, Sustainedge is not just an organization; it's a catalyst for positive change in creating resilient, sustainable and inclusive communities globally.

*At Sustainedge, our mission is clear: to deliver cutting-edge strategies and technologies that pave the way for sustainable urban development. We understand the urgent challenges we face in today's rapidly changing world, from climate change to urbanization. These challenges demand innovative solutions that prioritize environmental stewardship, social equity and economic resilience.*

***Md. Mamunur Rashid***  
*Managing Director*

- **Green Infrastructures and Ecosystem Services:** Designing and implementing green infrastructures and ecosystem-based solutions to enhance biodiversity and promote sustainable land use practices.
- **Sustainable Agriculture and Food Systems:** Offering expertise in sustainable agriculture and food systems, supporting regenerative farming practices and promoting food security.

## Our Services

### Research, Advocacy and Policy Development

Sustainedge offers a suite of services that target policy development and advocacy efforts aimed at promoting sustainability. The organization places a high priority on gathering reliable and relevant information and presenting it analytically and compellingly. By doing so, Sustainedge seeks to highlight the tangible impact of environmental issues on people's lives and to identify areas for policy development and advocacy. This approach also allows Sustainedge to adapt and refine its strategies based on feedback and additional research.

### Environmental and Sustainability Actions

Sustainedge takes a comprehensive approach to addressing environmental issues, considering the full range of potential impacts and seeking to identify and connect disparate issues and exposures. The organization integrates environmental concerns into actionable programs to build climate resilience and develop effective environmental planning. This involves gaining a deep understanding of the issues at hand, assessing and developing baseline scenarios and maximizing program impact.

## Building Partnerships with Local, National and Global Actors

Sustainedge works towards establishing strong partnerships and promoting collaboration among local, national and global actors to encourage knowledge sharing and create synergies. By bringing together diverse groups and facilitating cooperation, Sustainedge provides a common platform for events such as conferences, seminars and workshops, which promote collective action towards sustainable goals.

## Capacity Development

This service addresses a range of issues related to effective program design, management, strategic planning and assessment, helping individuals and organizations to build their skills and become more effective agents for change. By investing in capacity development, Sustainedge helps to ensure that sustainability initiatives are successful in the long term.

## Publish Environmental Action-Oriented Knowledge

Sustainedge develops and publishes a range of action-oriented, knowledge-based products within its areas of expertise. These publications include research reports, case studies, policy briefs, review-based articles and thematic videos and documentaries. To create these resources, Sustainedge collects field-based evidence, reviews, and assesses research and engages in rigorous analysis and assessment. By sharing these resources with a broader audience, Sustainedge helps to raise awareness of environmental issues and promote sustainable solutions.

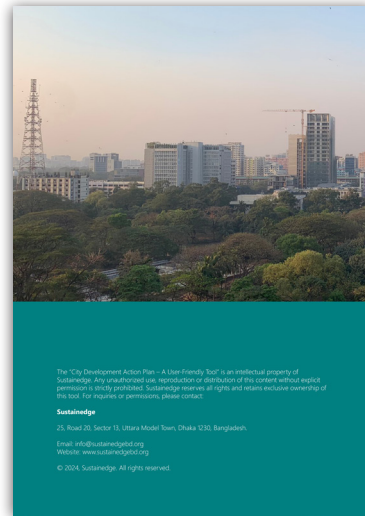

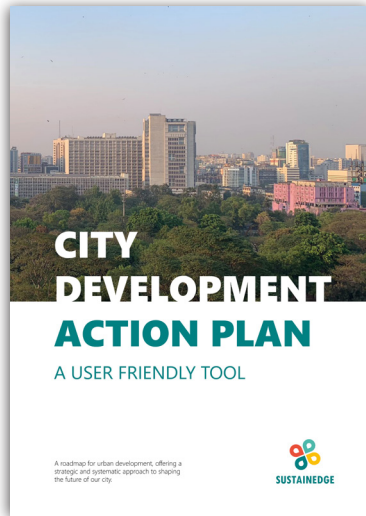

*Transforming Cities  
Empowering Change  
Shaping a Sustainable Future*

# Our Featured Tool

The *City Development Action Plan – A User Friendly Tool*, is a comprehensive tool serves as a roadmap for urban development, offering a strategic and systematic approach to shaping the future of our city. Grounded in sustainability, resilience and community engagement, this tool empowers city stakeholders to envision, plan and implement impactful projects over the next 5 years.
